

# Eggfix

## COMPOSITION

Eggfix Tablet: Each film coated tablet contains Red Clover 60 mg, L-arginine 24 mg, Vitex Negundo 100 mg, Myo-inositol 220 mg, Cranberry Extract 100 mg, EPA 90 mg, DHA 55 mg, Ginseng Root Extract 60 mg, D-Mannose 100 mg and Antioxidants enriched with vitamins & minerals.

## DESCRIPTION

Eggfix tablet contains highly concentrated vitamins, minerals, amino acids that enriched with antioxidant properties, which help to restore female hormonal balance, promote regular ovulation, prevent early miscarriage, reduce recurrent miscarriage and support overall reproductive wellness.

- Red Clover nourishes uterus and balances hormone. It has a strong alkalizing effect on the female reproductive organ, which creates a more sperm-friendly environment in the vagina, uterus and fallopian tube in favor of conception. Red clover increases cervical mucus production and eliminates vaginal dryness.
- L-arginine promotes cervical mucus production by supporting the production of nitric oxide (NO). Nitric Oxide dilates blood vessels and helps to increase blood flow to the uterus, ovaries and genitals. Proper circulation to the reproductive organs is vital to the production of cervical mucus. If the cervical mucus is too thick it will be hard for the sperm to travel. L-arginine help to create light egg white cervical mucus and to make a more alkaline cervical mucus. L-arginine supports endometrial secretions and a healthy uterus during implantation and enhance female sexual arousal.
- Vitex increases luteinizing hormone production while inhibiting the release of follicle stimulating hormone, leading to an indirect increase in progesterone level. The excessive production of prolactin by the pituitary gland, resulting in irregular ovulation or anovulation. Vitex tends to normalize the prolactin secretion.
- Myo-inositol reduces insulin resistance, homocysteine level and improves fertility of women with PCOS, decreases birth defect and early abortion.
- Cranberry extract increases fertility in women with Luteal Phase defect. Luteal Phase defect is a hormonal disorder marked by insufficient progesterone levels, resulting in menstrual disorder and recurrent miscarriage. It boosts the production of healthy cervical mucus in women.
- EPA & DHA increases cervical mucus production & improves cervical mucus quality.

- Ginseng may positively affect hormone levels, tone uterine muscles, support healthy uterine function and enhance fertility.
- Antioxidants enriched with vitamins & minerals protect reproductive organs from free radicals.

### **INDICATION AND USES**

- ✓ Restore hormonal balance
- ✓ Improve oocyte and embryo quality
- ✓ Improve vaginal dryness and ovarian function
- ✓ Increase pregnancy rate and reduce miscarriage
- ✓ Promote fertile quality cervical mucus production
- ✓ Enhance libido resulting increase sex desire, pleasure and performance for male

### **DOSAGE AND ADMINISTRATION**

Orally 2 tablets daily or as directed by the healthcare professional.

### **CONTRAINDICATION**

Patients with known hypersensitivity to any of the tablet ingredients.

### **PRECAUTION AND WARNING**

Eggfix tablet may contain inactive ingredients, which can cause allergic reactions or other problems. Take precaution if you have any allergies before taking this supplement.

### **SIDE EFFECTS**

Generally well tolerated. Very few allergic reaction may be seen.

### **USE IN PREGNANCY AND LACTATION**

Recommended in pregnancy and lactation.

### **DRUG INTERACTIONS**

No interaction has been found.

### **STORAGE**

Store in a cool and dry place, away from light & moisture, Keep all medicines out of reach of children.

### **PACKING**

Eggfix Tablet: Each box contains 3 x 10's Tablets in ALU-ALU pack.
