DESCRIPTION

Gestavital tablet is a nutritional supplement for mothers-to-be that safeguards nutritional needs during pregnancy. It is a scientifically developed formula that contains 19 essential vitamins and minerals that provide comprehensive nutritional support throughout the pregnancy. It provides a source of nourishment for the mother and the baby and prevents premature birth.

- Folic acid prevents low folate levels in the body. It also helps prevent infant spinal cord birth defects through folic acid supplementation in women of childbearing age. It is essential for the development of cognitive abilities.
- Pyridoxine is involved in protein, fat, and carbohydrate metabolism and the creation of red blood cells and neurotransmitters.
- Methylcobalamin regulates body functions, such as cell multiplication, blood formation, and protein synthesis. It helps in the rejuvenation and protection of damaged nerve cells by producing a substance called myelin.
- Vitamin D₃/Cholecalciferol maintains blood calcium and phosphorus levels and mineralization of bone. It aids calcium absorption enabling bone growth and repair. It further prevents cartilage degeneration.
- Zinc promotes normal fertility and reproduction. Iodine is useful for the development of a healthy brain in the fetus.

INDICATION AND USES
