

Resperm

COMPOSITION

Resperm Tablet: Each film coated tablet contains Tribulus terrestris 40 mg, Docosahexaenoic Acid (DHA) 10 mg, L-arginine 24 mg, L-carnitine 40 mg, Maca Root 100 mg, Ginseng Root Extract 30 mg, Omega-3 fatty acid 50 mg and Antioxidants enriched with vitamins & minerals.

DESCRIPTION

Resperm tablet contains highly concentrated vitamins, minerals, amino acids that enriched with antioxidant properties, which all essential for the generation and maturation of healthy sperm.

- Tribulus terrestris has been used traditionally as a fertility and reproductive enhancing herb. It stimulates hypothalamus to produce gonadotropin-releasing hormone (GnRH). Then luteinizing hormone (LH) is secreted by the pituitary gland after receiving the GnRH signal from hypothalamus and LH stimulates special cells in the testes called Leydig cell, telling them to produce testosterone. Testosterone is essential for the production of sperm and semen.
- DHA plays an important role in the formation of a structure called acrosome on the head of sperm. When sperm meets the egg, acrosome bursts and releases hyaluronidase & acrosin, which helps the sperm penetrate into the egg.
- L-arginine is an amino acid and sperm head is made with L-arginine. L-arginine helps to increase sperm count and improve sperm quality. L-arginine is a precursor of nitric oxide (NO) and it relaxes the muscle in penis raising blood flow. Without L-arginine there would be no nitric oxide and without NO, men would not be able to erect sperm.
- L-carnitine can transport fatty acid from the blood into the mitochondria, where fats are burned to produce energy that translates into sperm motility. During ejaculation, sperm needs lot of energy in order to continue to swim.
- Maca nourishes and stimulates glands for secreting hormone. Maca increases testosterone levels thereby increasing energy, stamina & vitality and improves semen & sperm production.
- Ginseng helps to increase sperm count and improve motility and quality of sperm.
- Researcher shown that infertile men have lower concentration of Omega-3 fatty acid in spermatozoa than fertile men. EPA and DHA helps to improve infertility.
- Antioxidants enriched with vitamins & minerals protect reproductive organs from free radicals.

INDICATION AND USES

- ✓ Reduce erectile dysfunction & sexual impotency
- ✓ Improve semen quality & overall male infertility
- ✓ Protect reproductive organ from free radicals
- ✓ Help to treat Oligospermia, Teratospermia, Asthenospermia
- ✓ Enhance libido resulting increase sex desire, pleasure and performance for male

DOSAGE AND ADMINISTRATION

Orally 2 tablets daily or as directed by the healthcare professional.

CONTRAINDICATION

Patients with known hypersensitivity to any of the tablet ingredients.

PRECAUTION AND WARNING

Resperm tablet may contain inactive ingredients, which can cause allergic reactions or other problems. Take precaution if you have any allergies before taking this supplement.

SIDE EFFECTS

Generally well tolerated. Very few allergic reaction may be seen.

USE IN PREGNANCY AND LACTATION

Recommended in pregnancy and lactation.

DRUG INTERACTIONS

No interaction has been found.

STORAGE

Store in a cool and dry place, away from light & moisture, Keep all medicines out of reach of children.

PACKING

Resperm Tablet: Each box contains 3 x 10's Tablets in ALU-ALU pack.

Imported & Marketed by

Banasree, Dhaka-1219, Bangladesh
